

PUBLIC NOTICE

East Tennessee Natural Gas Company - Compressor Station 3107 has applied to the Tennessee Air Pollution Control Division (TAPCD) for a [major source operating permit renewal](#) subject to the provisions of paragraph 1200-3-9-.02(11) of the Tennessee Air Pollution Control Regulations (also frequently referred to as Title V regulations). A major source (Title V) operating permit is required by both the Federal Clean Air Act and the Tennessee Air Pollution Control Regulations.

The applicant is East Tennessee Natural Gas Company - Compressor Station 3107 with a site address of P.O. Box 98 (Station 3107) - Shady Grove Road, Monterey, TN 38574. They seek to obtain a major source operating permit for operation of an air contaminant source(s) as follows:

Station 3107 uses four (4) natural gas fired turbines to increase pipeline pressure and move natural gas through transmission pipelines. Natural gas enters from a pipeline where the turbine engines supply power to compressors which increase line pressure. Various support activities are also carried out in order to maintain proper operation of the facility. However, it should be noted that this facility has a current major source operating permit.
